PROFILE

Web developer who ships to production. I build web apps with Next.js and TypeScript, and I run the Linux server that hosts them: **live websites for real organisations on a VPS I set up and secure myself**. I am now studying for an MSc in Computer Science (Autonomous Systems) at ELTE and building strong fundamentals in Python and algorithms. Looking for a part-time student role in web development, DevOps / Linux, or IT support (French & English).

EXPERIENCE

Freelance Web Developer & Server Administrator 03/2025 – present
Remote · clients in Rwanda

- Built and maintain live websites for organisations including *General Consulting Group*, *Softscreatix* and *Models & Hostesses*.
- Set up and administer the Ubuntu VPS hosting all of them: SSH key login with a non-root user, root login disabled, firewall rules and fail2ban.
- Configured Nginx as a reverse proxy with SSL for several domains; I use staging subdomains to test changes before they go to production.
- Run the Next.js and Go apps with PM2 and data in PostgreSQL; I deploy from GitHub to the server with Git and fix merge conflicts there when they happen.
- Test and set up REST APIs with Postman (e.g. creating admin accounts through protected endpoints).
- Work with AI coding assistants (Cursor, Claude) to move fast; I am responsible for project structure, review, testing and deployment.

Junior Software Developer Intern 10/2024 – 01/2025
General Consulting Group · Kigali, Rwanda

- Built UI and backend features for web apps with Next.js, Go and PostgreSQL; prototyped mobile screens in React Native.
- Designed logos and business cards for clients.

Web Development Intern 05/2024 – 07/2024
TOST Group · Kigali, Rwanda: client websites with HTML, CSS, JavaScript and PHP

Mobile Development Intern 08/2023 – 09/2023
Neris Technology · Kigali, Rwanda: UI screens with Flutter

SELECTED PROJECTS

Models & Hostesses: booking platform
Next.js · TypeScript · Go · PostgreSQL

- Public model showcase, online application form and an admin dashboard to review applications. Self-hosted on my VPS. spy.modelshostesses.com

AziKazi: job-board mobile app (in progress)
React Native · Expo · Go · PostgreSQL

- Personal project to make job ads easier to find in Burkina Faso. Done so far: sign-up/login, posting and editing jobs.

Délices Est-Ouest: restaurant catalog
Next.js · Tailwind CSS

- Snack and catering catalog for a family restaurant, with automatic price calculation and WhatsApp ordering. delices-est-ouest.vercel.app

SKILLS

Comfortable with
Next.js, React, TypeScript, HTML, CSS, Tailwind
Linux (Ubuntu) server setup, SSH, Nginx, PM2
Git & GitHub
REST APIs, Postman
PostgreSQL basics

Learning / used in projects
Python (MSc coursework at ELTE)
Go (Gin)
React Native (Expo)

Tools
Figma, Canva, Cursor, Claude Code

EDUCATION

MSc Computer Science: Autonomous Systems
Eötvös Loránd University (ELTE), Faculty of Informatics, Budapest
Foundation year, 2026 – present

BSc Computer Science
Kigali Independent University, Rwanda
2021 – 2024

COURSES

ALX: AI-Augmented Professional Development, 2024
ICDL certificate, 2024
Internet of Things: STES Group, 2022

LANGUAGES

French: fluent
English: fluent
Hungarian: beginner (studying)

AVAILABILITY

20–25 hours per week: Tue, Thu, Fri daytime, weekends, and remote work in the evenings.
